

LOOKING FOR AN INNOVATIVE ROLE IN GENERAL PRACTICE?

Symphony Healthcare Services (SHS) is a rapidly growing NHS healthcare organisation in the south-west that is enabling GPs to practice in a new way.

Our employed GP roles will enable you to:

- Join a network of innovative practices with established new care models and clinical leadership roles
- Be supported by a large multi-disciplinary clinical team, practice clinical leads and skilled central team
- Develop your own portfolio role across primary and acute care settings, to suit your experience and clinical interests

SHS was launched in April 2016 as part of the Symphony Programme vanguard. Now, nationally recognised as leading the way in developing new models of care, we have grown rapidly to care for over 60,000 patients across 8 GP Practices in the south-west.

To support our continued growth, we are now recruiting additional GPs who want to use their skills in a broad clinical team and develop a role based on their clinical interests.

A competitive remuneration package is available based on the BMA GP contract and pay scale linked to national pay awards, plus additional incentive payments and allowances for clinical specialist skills or leadership roles.
