Subject: Vaccine update - MenB and Paracetamol / Shelf life for FluMist / Hep B blood spot testing

Dear all

I'd like to draw your attention to the latest issue of [Vaccine update](#), published in late December, in particular that it contains the following updates:

- MenB and central supply of paracetamol phase out
- Shelf-life for Fluenz Tetra and FluMist (2-17 years nasal flu vaccine)
- National free dried blood spot testing service for infants born to hepB+ mothers

NHS Employers have updated their [Vaccs and Imms FAQs](#) to include a question on MenB and paracetamol, as well as flumist expiry dates.

Best wishes

Cat
